

Assignment 7

LPO 9951 / Fall 2015

Complete the following steps:

1. Look at the sampling design section of the technical manual for your dataset. In no more than two paragraphs, describe the sampling procedure used.
2. In one paragraph, describe possible drawbacks of this sampling procedure for your proposed research.
3. Based on your reading of the technical manual, describe which weights you will use for your sample and why.
4. Next, describe why you think that these weights are important, and what might happen to your estimates should you not use them.
